Innomedica establishes an office at London BioScience Innovation Centre

Turku, 17.1.2008 - *Innomedica Oy Ltd improves its service portfolio by increasing its presence in the London area.*

Innomedica has signed an agreement with London BioScience Innovation Centre (LBIC) and from the beginning of January 2008 operates as one of its client companies. LBIC is London's premier bioincubator and biotechnology innovation centre and provides a supportive environment in a world-class city. LBIC offers a unique access to London life science cluster and networks which is reflected in the activities of various groups that provide regular opportunities to make new contacts via events, conferences and other meetings.

Michael Jones (President, Innomedica Oy Ltd) and Bradley Hardiman (Chief Operations Manager, LBIC) in front of the LBIC main entrance.

“In addition to Innomedica’s operations in Helsinki and Tokyo, our London office at London BioScience Innovation Centre gives us a strategic base from which we can serve our customers better”, says Michael T. Jones, the President of Innomedica Oy Ltd and continues “We will use this new office in London for our rapidly growing partnering and licensing activities between Japan and Europe. We also believe that our other client projects within Central Europe will benefit from the facilities and networks LBIC can offer”.

About Innomedica

Innomedica Ltd. is an established international business development company focused on the Life Sciences. Innomedica provides a range of professional services to our clients in both the public sector and private sectors.

Innomedica's activities are in four main areas: [Licensing & Partnering](#), [Japan Markets](#), [Business Development](#) and [Project Management](#). We are active on a global basis, though we specialise in the North European and Japanese markets.

Our people are our main asset. Our success is based on leveraging the experience of professionals from different disciplines to deliver value to our clients. In addition we have engineering and biomedical expertise in house. Innomedica Ltd was founded in 1997 in Turku, Finland, and it is a privately held company.

Our client base covers both private and public sectors, both large and small. Please contact us for a company presentation or a proposal. Then we can become also *Your Partner* in Life Sciences.

About LBIC

The London BioScience Innovation Centre (LBIC) provides a focus for life sciences activity in the UK capital, offering laboratory and office facilities of an exceptionally high standard and a professional front door that cannot fail to impress.

Our friendly and flexible approach makes us a first port-of-call for many companies new to London, as well as for those companies already established in the UK and seeking to graduate to the next level.

Owned by the prestigious Royal Veterinary College, LBIC is the first and only incubator for biotechnology companies in central London and is home to small start-ups as well as more established players.

We welcome biotechnology and diagnostic companies, life science product and service providers, venture investors and small pharmaceutical companies.

LBIC clients benefit from shared networking space and meeting rooms as well as close proximity to the various financial services available throughout the Capital.

We are centrally located, just a ten minute walk from both Kings Cross and Euston mainline stations, next to the Royal Veterinary College.
